BACKGROUND DISCUSSION:

The Veteran's Park secondary water system consists of a pumping station and irrigation water storage pond, which irrigates the Park and City Hall landscaping. The pumping station and water storage reservoir are being relocated as part of the proposed paved road between the Senior Center and the Library. This project will demolish the old irrigation pond which is a rubber membrane – lined pond that is deteriorating, and replace it with a concrete lined irrigation pond. The old pond is seven feet above the ground on the east bank and poses a flooding hazard should the bank become unstable and breach. The new pond will be constructed at or below grade.

The project will also grade and pave the existing dirt road between the rodeo grounds and the irrigation pond and add a sidewalk and pedestrian road crossing. The new road will connect the Senior Center parking lot to the Viridian Library parking lot, allowing both foot and vehicular traffic to travel between these buildings. The City has been in contact with the Senior Center and the County Library, and both parties are excited to see the road go in.

The bid was advertised in Intermountain Contractor and the classified ads of local newspapers for three weeks prior to the bid opening on Tuesday, May 19, 2015. Eight companies submitted bids. The lowest bid was from Gerber Construction, Inc. at \$946,900.00, and the other bidders were very close to this amount, indicating a good understanding of the work, see attached bid results. Gerber is well qualified to perform the work and has experience on similar projects. Staff recommends accepting the bid of Gerber Construction, Inc. for the construction of the Veteran's Park Irrigation Pond Reconstruction and Road Project for a cost not to exceed \$946,900.00.
